

## What is the Corona virus?

Corona viruses can give people mild colds and up to severe pneumonia (SARS-CoV-2 = virus, COVID-19 = disease)

## Precautions:

- Regularly wash your hands with soap for at least 20 seconds
- Do not cough or sneeze into your palm or hand, cover your mouth and nose with a tissue
- Keep a minimum distance of 1 to 2 metres from persons suspected of being ill

## When is a case suspicious?

In the 14 days prior to the onset of your symptoms,

**were you**

in close contact with a confirmed or suspected COVID-19 case?

**or**

in a region in which sustained transmission of SARS-CoV-2 must be assumed?

Visit the following link for the currently identified areas of risk:

<https://www.sozialministerium.at/Themen/Gesundheit/Uebertragbare-Krankheiten/Infektionskrankheiten-A-Z/Neuartiges-Coronavirus.html>

**AND**

Do you have symptoms indicating an acute respiratory tract infection (sudden occurrence of at least one of the following symptoms: **cough, fever, shortness of breath**)?

## What to do in case of suspicion?

If both conditions (risk area/contact and symptoms) exist, stay at home and call

Health advice at **1450**

to coordinate further action with you.
